

Introduction

These release notes are for the Gira BluOS plugins. These plugins can be used to control music streaming functionality in BluOS products.

Dependencies

- Requires BluOS v4.16.0 or higher.
- Requires Gira Project Assistant (GPA) 6.0 or higher.

Change Log

Version 2.0.0 (July 14, 2026):

- Fixed the null reference exception error after Logic Engine Restart.
- Fixed issue where BluOS Controller app skips “repeat all” while Gira is up and running.

Version 1.0.119 (February 8, 2024):

- Initial public release.

Notes

- The Gira X1 server may require a reboot after any driver update.
- **A fresh installation is required for using GIRA BluOS plugin v2.0.0.**
